Abhinav Krishnan S R

Product Designer | UI/UX Design | AI, Enterprise SaaS, B2B, B2C &
Fintech Products | Design Systems | Zero-to-One Product Design |
MS HCI | Open to Full-Time Roles
Houston, Texas, United States

Summary

I design products from zero to one, the messy, ambiguous stage where there is no roadmap, no design system, and no time to waste. In the last 4 years I have shipped enterprise marketing platforms at scale, an investor ready AI job match platform MVP in 30 days, and a fintech orchestration platform from concept to launch, with work spanning healthcare and maritime. What teams hire me for: → End to end ownership: research, journey mapping, wireframes, interactive prototypes, high fidelity UI, and production ready dev handoff → Design systems that scale: reusable Figma component libraries spanning web and mobile that cut engineering handoff friction → Making complex systems feel simple: enterprise campaign workflows, AI match ranking logic, multi tenant recruiter access, financial orchestration, real time health monitoring → Evidence over opinion: 150+ usability sessions at Merkle that lifted engagement 22% on an enterprise campaign platform I work fluently with PMs, engineers, and founders in Figma, Framer, and React based workflows, with working knowledge of HTML, CSS, JavaScript, and AI assisted design tools like Claude Code and Figma MCP. Recent work: Merkle: Led end to end design for the Enterprise Campaign Orchestrator, partnering with PMs, business analysts, and engineers across three Agile squads to simplify complex marketing workflows for enterprise clients, lifting user engagement by 22% and improving conversion across critical journeys. SquareResults: Designed an AI powered job match platform (candidate swipe experience + recruiter dashboard), concept to investor ready MVP in 30 days. Anthem Nation: Built Harmony, a financial orchestration platform, from zero to one, covering brand, design system, Framer site, and mobile framework. Vesseli: Redesigned onboarding for a B2B2C maritime platform supporting 100+ yacht deliveries annually. MS in Human Computer Interaction, Arizona State University. Open to full time Product Designer / UX/UI Designer roles: on site, hybrid, or remote (US) # Authorized to work in the US, no

Experience

SquareResults

Product Designer

December 2025 - Present (9 months)

Scottsdale, AZ

- Owned end-to-end product design for an AI-powered job match platform connecting candidates and recruiters, driving the experience from early concept through investor-ready MVP screens shipped in 30 days.
- Crafted the candidate-facing job swipe experience and recruiter dashboard using Figma, translating AI-driven match recommendations into intuitive, scannable interfaces that made complex ranking logic feel effortless to end users.
- Architected role-based interfaces for multi-tenant recruiter workflows, accounting for distinct access levels and data boundaries between recruiter, candidate, and admin experiences in close collaboration with the engineering team.
- Established a scalable Figma component system spanning the web app and mobile app, ensuring design consistency across platforms and significantly reducing engineering handoff friction.
- Bridged design and engineering throughout the full build cycle, aligning design decisions with technical constraints across a web and mobile stack to ship production-ready screens on an aggressive MVP timeline.

Anthem Nation

UI/UX Designer

December 2025 - June 2026 (7 months)

New York, United States

- Conceptualized and delivered end-to-end product design for Harmony, a financial orchestration platform helping businesses automate and control money management, distribution, and tracking, building the full website in Framer and designing the mobile framework, brand toolkit, color system, and scalable design system in Figma from zero to one.
- Crafted high-fidelity visual interfaces for Anthem Academy and Anthem Fest, two interconnected education and events products under the Anthem Nation umbrella, ensuring a cohesive and consistent experience across both platforms.

- Rearchitected the information structure across all three products, simplifying how users navigate between distinct content areas and reducing friction across the full Anthem Nation product ecosystem.

Vesseli

UX/UI Designer

October 2025 - December 2025 (3 months)

- Designed comprehensive end-to-end UX for B2B2C maritime platform projected for 4.8M+ users (currently 1000+ users), enhancing user satisfaction.
- Improved onboarding completion rate by 58% through journey mapping, rapid prototyping, and testing cycles.
- Built fully responsive Figma component system significantly reducing developer handoff time by 62% across multiple projects.
- Partnered closely with CEO and engineers to prototype innovative features supporting 100+ yacht deliveries annually.

Merkle

Product Designer

July 2024 - August 2025 (1 year 2 months)

Columbia, MD

- Led the end-to-end product design lifecycle for handling enterprise marketing platforms, conducting discovery workshops, user research, journey mapping, wireframing, prototyping, and design validation activities that increased user engagement by 22% for the Enterprise Campaign Orchestrator (ECO).
- Collaborated with Product Managers, Business Analysts, and Engineering teams across three Agile squads to define feature requirements, prioritize roadmap initiatives, and deliver user-centered solutions supporting campaign management and customer experience workflows.
- Designed user flows, information architecture, low-fidelity wireframes, interactive prototypes, and high-fidelity interfaces in Figma, simplifying complex marketing workflows and improving overall platform usability.
- Conducted usability testing sessions with 150+ users and analyzed user behavior through analytics and feedback data, identifying friction points that improved conversion rates and reduced user drop-off across critical user journeys.
- Established reusable design patterns, component libraries, and scalable design system standards, ensuring visual consistency, accessibility compliance, and efficient collaboration between design and development teams.

Jewish Healthcare Foundation
UX Designer (SISL - INTEL)
January 2024 - May 2024 (5 months)
Tempe, AZ

- Designed real-time glucose monitoring dashboards, enabling faster emergency interventions and improving patient care outcomes.
- Conducted extensive usability studies with 150+ participants to significantly improve system efficiency and reduce errors.

Arizona State University
Teaching Assistant (Human Systems Engineering)
July 2023 - December 2023 (6 months)
Tempe, Arizona, United States

- Mentored over 45 students in designing cross-platform user experiences by integrating interaction design principles, accessibility practices, and effective wireframing techniques.
- Supported course enhancements by providing design feedback and interface evaluations, contributing to a 36% improvement in overall class performance.

Datamatics
UX Designer
August 2021 - August 2022 (1 year 1 month)
India

- Developed wireframes and interactive prototypes for enterprise software solutions, improving user experience and design clarity.
- Assisted in competitive analysis and component library maintenance, ensuring consistency and efficiency across all projects.

DLK Technologies India Private Limited
Graphic Designer
July 2021 - August 2021 (2 months)
Chennai, Tamil Nadu, India

- Enacted usability testing on an education platform, identifying pain points and suggesting design improvements that led to a 20% increase in user engagement.
- Assisted in creating a design system for one of the client projects, standardizing UI elements and improving design consistency, which resulted in a 25% reduction in design iteration time.

Education

Arizona State University

Master's degree, Human Computer Interaction

Meenakshi Sundararajan Engineering College

Bachelor of Technology - BTech, Information Technology
